OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY IN MYSORE, BANGALORE.

(Health of Livestock during December 1949.)

In their order of severity, outbreaks of Rinderpest, Black-quarter, Anthrax, Foot and Mouth, Hæmorrhagic-Septicæmia, Contagious-Goat-Pleuro-Pneumonia, Sheep-pox and Ranikhet diseases were encountered in the State during December 1949. Rinderpest was prevailing in five villages of Alur, Arkalgud and Chikmagalur Taluks during the month. Altogether 187 villages were reported to have been affected by one or the other of the above contagious and infectious diseases as aginst 224 villages during the previous month. The number of outbreaks was highest in Mysore, Bangalore, Kolar and Tumkur Districts, while Chikmagalur District was least affected. These diseases accounted for 942 attacks of which 438 animals succumbed, as against 1,022 attacks and 633 deaths during the previous month.

The departmental staff undertook 27,743 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease, as against 26,979 inoculations and vaccinations during the previous month. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Diseases caused by internal parasites were reported from 210 villages resulting in 90 deaths, as against 241 villages accounting for 18 deaths during the previous month. The special staff attached to the parasitic disease control units and the Sheep Breeders' Associations of the Department dosed 14,546 animals as against 14,833 animals during the previous month.

The rest of the livestock ramained free from diseases dur the month and fodder and water were generally availa throughout the State.
